

Software Inventory & Licensing Plan

This document outlines the company-wide software stack, licensing allocations, and departmental technology requirements for secure and scalable operations.

Core Operating Software (Company-Wide)

Department	Software Stack	Licensing	Purpose
Executive Management	DocuSign / Adobe Sign	3 User Licenses	Secure executive digital signing workflow and approval management.
Finance Department	Xero / Sage Pastel	4 User Licenses	Cloud accounting, payroll management, and financial reporting with MFA enforced.
Human Resources	HRMS Portal	3 User Licenses	Employee records management, leave tracking, and onboarding workflows.
Sales & Marketing	HubSpot / Zoho CRM Canva Pro	7 CRM Licenses 2 Creative Licenses	Customer relationship management, campaign coordination, and creative asset design.

Specialized Departmental Software

Category	Platforms / Tools	Licensing	Scope & Purpose
Operating Systems	Windows 11 Pro / Ubuntu Linux	OEM licenses bundled with hardware purchases; open-source licensing for Linux environments.	Primary operating systems for business workstations, laptops, and development systems.
Productivity & Collaboration	Google Workspace OR Microsoft 365 Business Standard	25 × Per-user monthly subscriptions	Cloud email hosting, shared cloud storage (Drive/OneDrive), document collaboration, and video conferencing.
Endpoint Security & Defense	Bitdefender GravityZone OR Microsoft Defender for Business	25 × Managed endpoint licenses	Centralized cloud-managed protection covering malware, anti-phishing, and ransomware isolation.

Department	Software Stack	Licensing	Purpose
Software Development	■ GitHub Team ■ VS Code (Open Source) ■ Docker Desktop Team	8 GitHub Licenses Zero-cost IDE 8 Docker Licenses	Version control, software development, code editing, containerization, and deployment workflows.

Security Baseline & Access Governance

Principle of Least Privilege (PoLP) must be enforced across all systems and network resources. Employees may only access systems, directories, and applications required for their designated functional roles. Cross-departmental read/write access must require explicit approval from Executive Management and be logged for auditing purposes.

Prepared for scalable business operations, compliance readiness, and secure digital transformation.
